[X]

comments received

$[X]^+$

new followers

~2 hrs

total time spent

0

posts ever missed

Fill in [X] with your real numbers on Day 10

Swipe to see what worked vs what didn't →

What worked best

PDF Carousels

3-4x more views vs text posts

Replying to comments

Each reply = 200+ extra impressions

DM outreach

40% of all comments came from DMs

Free giveaway CTAs

DATAGEN = most DM requests by far

8hr reactivation comment

Doubled each post's lifespan

Carousels + comments = the winning formula.

What didn't work

(being honest matters more than looking good)

Single image posts

30% less reach — confirmed every time

Generic hooks

Low dwell time = algorithm buries it

Posting and ghosting

No replies in hr 1 = post gets buried

5+ hashtags

Hurt more than helped in 2026

Transparency builds more trust than perfection.

The 3 biggest lessons

1

Consistency > Perfection

5 decent posts beats 1 perfect post. Always.

2

Format is strategy

PDFs aren't just design — they're algorithm fuel.

3

AI amplifies, not replaces

AI = leverage. Your expertise = credibility.

These 3 changed how I work forever.

The full system in one slide

Claude AI

Strategy + all content writing

Claude in Chrome

Browser automation — zero clicks

Canva

PDF carousel creation

LinkedIn Scheduler

Auto-publish at 8:30 AM daily

15-min routine

Golden hour engagement daily

8hr reactivation

Extend every post's lifespan

Total daily time: 15 minutes. That's it.

Everything FREE today ■
